Close contact means:

A close contact is a person who has been close to someone who has tested positive for COVID-19. You can be a contact anytime from 2 days before the person who tested positive developed their symptoms, and up to 10 days after. This is when the virus can be passed to others.

A risk assessment may be undertaken to determine this, but a contact can be:

- anyone who lives in the same household as someone with coronavirus (COVID-19) symptoms or who has tested positive for coronavirus (COVID-19)
- anyone who has had any of the following types of contact with someone who has tested positive for coronavirus (COVID-19) with a PCR or LFD test:
 - face-to-face contact including being coughed on or having a face-to face conversation within 1 metre
 - been within 1 metre for 1 minute or longer without face-to-face contact
 - sexual contacts
 - been within 2 metres of someone for more than 15 minutes (either as a one-off contact, or added up together over one day)
 - travelled in the same vehicle or a plane

Examples of close mixing:

- A form group or subject class
- A friendship group mixing at break times
- Sports team
- A group in an after-school activity
- A private tutor or coach offering one-to-one tuition to a child, or to multiple children at the same time
- Staff and children taking part in the same class or activity session together
- Children who have slept in the same room or dormitory together

RISK ASSESSMENT FORM - MANAGING HEALTH AND SAFETY

The level of risk is calculated by:	The likelihood	x	The Consequence
	1- Very unlikely		1- Insignificant (no injury)
	2- Unlikely		2- Minor (minor injury needing first aid)
	3- Fairly likely		3- Moderate (up to 3 days absence)
	4- Likely		4- Major (more than 3 days absence)
	5- Very likely		5- Catastrophic (death)

Risk rating:

1 – 4	Low (acceptable)	No further action required
5 – 9	Medium (adequate)	If risk cannot be lowered any further, consider risk against benefit. Monitor and look to improve at next review
10 – 16	High (tolerable)	Identify further control measures to reduce risk rating. Seek further advice e.g. line manager, H&S team, etc.
17 - 25	Very High (unacceptable)	Do not undertake the activity. Implement immediate improvements
